The Fall cohorts for the past ten years are tracked.

The STEM survey is made up of two parts (Sections 2 & 3). Both sections track the retention and graduation rates for first-time, full-time students who declare a STEM discipline as their intended major.

Section 2 tracks those students who begin as a STEM major and continue or graduate within a STEM major at your institution, and also those who change to a non-STEM major.

Section 3 tracks those students who begin as a STEM major and continue or graduate within any STEM major at your institution.

Data are reported not only on the Total cohort of students, but also on the sub-cohorts by gender and race/ethnicity.
